

B12

One of the most critical but overlooked vitamins in the world is vitamin B12. Vitamin B12 is involved in the metabolism of every cell of the body. If left untreated, vitamin B-12 deficiency can lead to prolonged blood diseases as well as neurological issues. Here are seven warning signs associated with vitamin B-12 deficiency:

Forgetfulness | Chronic and uncharacteristic forgetfulness may indicate a B12 deficiency. Many patients assume that they are suffering from dementia or Alzheimer's, especially in their senior years while all they lack is B12.

B₁₂

Muscle Weakness | Lack of vitamin B12 and insufficient oxygenation to muscles can result in sluggishness and uncharacteristic muscle weakness. Suddenly an individual who carries big loads will not be able to manage a heavy purse or a gym bag.

Pale Complexion | Those suffering from B12 deficiency are pale in complexion due to the lack of red blood cells. The body releases excess bilirubin, which zaps those rosy cheeks and leaves behind a pale, yellow visage.

Pins and Needles | Experiencing pins and needles throughout your body when you haven't compressed your body could be signs of B12 deficiency. Numbness or the feeling of electric shock waves could be a result of nerve damage in B12 deficient patients.

Unexplained Fatigue | Fatigue felt for days even though you regularly get a good night's sleep may be the result of a B12 deficiency. Lack of red blood cells means oxygen transport to your organs is lacking, which is what is causing extreme fatigue.

B12

Vision Issues | Low B12 stores over the long term can lead to vision changes and damage your vision. Retinal damage can be results of the blood vessels in the eye that are blocked. As a result, you may experience light sensitivity, blurred or double vision, tracers or shadows, which all result from damage to the optic nerve.

Dizziness | Frequent bouts about dizziness and vertigo can indicate B12 deficiency. You may experience a feeling of wobbles when you get up too fast from a sitting position. You may also feel dizzy when you walk up or downstairs.
